Forecast for Saturday 26 Nov 2022

Weather: Dry with clear spells through the early hours. Some sunny spells through the morning, especially across eastern hills, but cloud increasing bringing outbreaks of rain to western hills towards midday. The rain turns more persistent and heavier through the afternoon, with water courses becoming fast flowing. The rain turning lighter and patchier towards midnight.

Chance of cloud-free hill tops above 600m: Around 75% at first, becoming near zero in west and around 25% in north and east by early afternoon. Chances improve towards midnight

Low cloud and visibility: Occasional above 600-750m at first, but becoming periods or persistent above 450m-600m, with patches below, by early afternoon. Away from cloud, visibility good or very good becoming just a few kilometres in heavier rain.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Feeling cold the very strong winds and heavy rain, making difficult conditions. Gusts around 65mph expected over ridges and summits from mid-afternoon.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
15:00 on Fri 25 Nov 2022	14.6mm	35.6mm	55.6mm

Forecast for Sunday 27 Nov 2022

Weather: Any rain clearing the early hours with clear spells developing. Then a largely dry day with some good spells of sunshine, although this may be rather hazy at times. Increasing cloud through the late afternoon brings an increasing risk of showery rain through the evening.

Maximum wind: Southwesterly 25mph, gusts around 40mph, easing 15-20mph through the early hours, winds turn more southerly through the afternoon.

Chance of cloud-free hill tops above 600m: Around 90% through much of the day, chances fall in the evening.

Low cloud and visibility: Generally only small amounts of cloud above about 750m becoming occasional or periods in the evening. Otherwise visibility very good falling to several kilometres in evening showers.

Temperature: **Valleys:** Falling to around 7 or 8 Celsius by dawn then rising to plus 11 or 12 Celsius by day
At 600m: Around plus 9 Celsius falling plus 5 Celsius
Freezing level: Above the summits, but falling.
